

Iris Checo Testimonial

What is your name?

Iris Checo (unsure of spelling).

And how did you get involved with the program?

Well, at the moment I am unemployed and I am currently searching for work. I was in a parking lot and that had information about the program and it seemed interesting. I found out a little more about the program and once I understood what it was about I said “excellent.” So i took the class.

And now that you're taking the class, what do you think about it?

Its phenomenal. Because it's knowledge, and knowledge, for me, is power. And that helps my resume, as soon as I finish, of course. And now I have more tools to share with people and I can apply these tools on a daily basis. I find it very interesting.

And once you have completed the course, what are your future plans?

Well, I work in medical insurance, and O think my employers would be fascinated to know that I have knowledge in the field of.... Medical insurance, that's why i took the course.

What would you tell people who are unemployed and interested in the course?

That they should search. There are many opportunities, many courses, that will help you in your growth, and that's what happened to me. Every day when I wake up I'm looking for options and this one seemed, to me, very important.

And what's special about taking this course at WE ACT?

Well first off, it's free. That's not all but, these days with cost of living being so high, that for me was an excellent option. Really it's the knowledge and tools that were given. For me, it was the best.
